

25. Many animals live in social groups and have behaviours that are adapted to group living. Which row in the table matches a type of behaviour with an example of this behaviour?

	Type of behaviour	Example of behaviour
A	cooperative hunting	vampire bats giving a blood meal to other bats
B	reciprocal altruism	herring forming large groups to confuse predators
C	cooperative hunting	killer whales (Orca) working together to kill seals
D	social defence	killer whales (Orca) working together to kill seals
